Continuation of 5. does NOT place the application in condition for allowance because: applicant questions examiner's motivation of combining Parker and Samson I, however as the applicant himself as agreed the Samson I teaches a catheter with a braid and a coil and the braid will provide some support to the device which is the motivation the examiner has used to combine the two applications. furthermore In re Gazda, 219 F2d 449, 452, 104 USPQ 400, 402 (CCPA 1955) a modification of reversing part has been recognized to have been obviouse to one ordinary skill in the art.. As mention earlier the applicant himself agrees that Samson teaches the applicant's invention however the arrangment of the coil and braid is in reverse of the applicants. hence all the applicant has done is to reverse parts (coil and braid) in Samson.
